

In the Claims

Please enter the following amendment.

Claims 1-22 (previously canceled).

23. (Currently Amended Twice) A method of delivering a drug to a patient in need thereof, comprising

administering a therapeutically or prophylactically effective amount of the drug in a formulation comprising a porous matrix which comprises a wetting agent and microparticles of the drug, wherein the microparticles have a mean diameter between about 0.1 and 5 μm and a total surface area greater than about $0.5 \text{ m}^2/\text{mL}$, and wherein the porous matrix has a TAP density less than or equal to 1.0 g/mL and/or has a total surface area of greater than or equal to $0.2 \text{ m}^2/\text{g}$ and is in the form of a dry powder, and

wherein the porous matrix is made by a process comprising

dissolving the drug in a volatile solvent to form a drug solution,

combining at least one volatile salt with the drug solution to form an emulsion,

suspension, or second solution,

incorporating at least one wetting agent into the emulsion, suspension, or second solution,

and

removing the volatile solvent and volatile salt from the emulsion, suspension, or second solution to yield the porous matrix.

24. (Original) The method of claim 23 wherein the formulation is suitable for administration by a route selected from the group consisting of parenteral, mucosal, oral, and topical administration.

25. (Previously Amended Once) The method of claim 24 wherein the parenteral route is selected from the group consisting of intravenous, intraarterial, intracardiac, intrathecal, intraosseous, intraarticular, intrasynovial, intracutaneous, subcutaneous, and intramuscular administration.

26. (Original) The method of claim 24 wherein the mucosal route is selected from the group consisting of pulmonary, buccal, sublingual, intranasal, rectal, and vaginal administration.

27. (Original) The method of claim 23 wherein the formulation is suitable for intraocular or conjunctival administration.

28. (Original) The method of claim 23 wherein the formulation is suitable for intracranial, intralesional, or intratumoral administration.

29. (Previously Amended Once) The method of claim 23 wherein the formulation is suspended in an aqueous solution suitable for parenteral administration.

30. (Original) The method of claim 23 wherein the formulation is in a tablet or capsule suitable for oral administration.

31. (Original) The method of claim 23 wherein the formulation is in a suppository suitable for vaginal or rectal administration.

32. (Previously Amended Once) The method of claim 23 wherein the formulation is suitable for pulmonary administration.

33. (Previously added) The method of claim 23 wherein the dry powder form of the porous matrix has a TAP density less than or equal to 1.0 g/mL.

34. (Previously added) The method of claim 23 wherein the dry powder form of the porous matrix has a total surface area of greater than or equal to 0.2 m²/g.

35. (Previously added) The method of claim 23 wherein the mean diameter of the microparticles is between about 0.5 and 5 μ m.

36. (New) The method of claim 23 wherein the drug is a low aqueous solubility drug.

37. (New) The method of claim 36 wherein the drug is selected from the group consisting of albuterol, adapalene, doxazosin mesylate, mometasone furoate, ursodiol, amphotericin, enalapril maleate, felodipine, nefazodone hydrochloride, valrubicin, albendazole, conjugated estrogens, medroxyprogesterone acetate, nicardipine hydrochloride, zolpidem tartrate, amlodipine besylate, ethinyl estradiol, omeprazole, rubitecan, amlodipine besylate/benazepril hydrochloride, etodolac, paroxetine hydrochloride, paclitaxel, atovaquone, felodipine, podofilox, paricalcitol, betamethasone dipropionate, fentanyl, pramipexole dihydrochloride, Vitamin D₃, finasteride, quetiapine fumarate, alprostadil, candesartan, cilexetil, fluconazole, ritonavir, busulfan, carbamazepine, flumazenil, risperidone, carbamazepine, carbidopa/levodopa, ganciclovir, saquinavir, amprenavir, carboplatin, glyburide, sertraline hydrochloride, rofecoxib, carvedilol, halobetasol propionate, sildenafil citrate, celecoxib, chlorthalidone,
